Project: ***Customer & Admin Facing Mobile Application Development***

Client: ***Bombino Express*** **Date:** ***February 18, 2026***

→ Executive Summary

OnShore Labs will build a customer and admin-facing mobile app for Bombino's India → USA shipping operations, integrating with ITD's courier management system.

After reviewing ITD's APIs, we've identified what's immediately deliverable versus what requires additional API development. We propose a phased approach that lets you launch quickly with core features, then enhance as we build additional custom APIs.

The same will run in parallel with Xpression for USA → India shipping operations once they revert with their available APIs and system architecture.

IMMEDIATE DELIVERABLES ON THE APP:
✅Rate checking
✅Shipment creation
✅Tracking
✅AI chat support

→ Phased Delivery Plan

PHASE 1: Customer App (Android & iOS) Timeline: 6 weeks | Cost: ₹2,95,000

✅ READY TO BUILD (with current ITD APIs):

1. User Login & Profile
   • Login with credentials (users pre-created by admin)
   ⚠️ *Current Limitation: No self sign-up in Phase 1*

2. Rate Calculator
   • Instant shipping quotes for multiple carriers

- Price breakdown (base rate + fuel + taxes)

3. Create Shipments
   - Complete booking with shipper/consignee details
   - Package dimensions, weight, invoice
   - Service selection

4. Track Shipments
   - Track by AWB number
   - View current status and history

5. Shipment History
   - View all past shipments made through the App
   - Filter and search

   ⚠️ *Current Limitation: No API for fetching old records of shipments not made via the app*

6. AI-Powered Features
   - 24/7 chat support for queries
   - Rate calculations via chat ("How much to ship 5kg to New York?")
   - Tracking status via chat ("Where is my last shipment?")
   - Shipment guidance ("What documents do I need?")
   - Natural language support in English, Hindi and Hinglish

7. Professional UI/UX
   - Benchmark: DHL/FedEx apps
   - Bombino branding
   - Demo: https://demo-client-portal--arbaaz6.replit.app

💵**Payment Milestones:**

Milestones	Amount (Inclusive of 18% GST)
50% at kick-off	₹1,47,500
25% at UAT	₹73,750
25% at Delivery	₹73,750
Total Phase 1	**₹2,95,000**

<u>PHASE 2:</u> In-App Resolution & Voice AI Timeline: 6 weeks | Cost: ₹6,90,000

Features:

📲Customer App:
• Self sign-up journey on the app with Digital KYC
• Upload documents for customs clearance
• Pay customs duties in-app (Razorpay/Stripe)
• Real-time push notifications
• Track document verification status
• Resolve hold-ups without leaving app

💻Admin Portal (Web):
• Dashboard for operations team
• Review uploaded documents
• Monitor payments
• Clear shipments
• Manage hold-ups

🤖Voice AI Agent:
• Phone-based AI support (24/7)
• Voice-activated tracking and queries
• Multi-language voice support
• Seamless escalation to human agents

💵Payment Milestones:
• 50% at kick-off: ₹3,45,000
• 50% at delivery: ₹3,45,000

<u>PHASE 3:</u> Admin-Facing Application | Timeline: 3 weeks | Cost: ~ ₹2,90,000

Features:

• In-app visibility of on-going operations
• Clear view of parcel category and AWB mapping on the application for easier segregation at the US airport
• Payment reconciliation for COD through in-app updates

• Master Tracking of on-going shipments on role-based access
• Any other additional feature short-listed before kick-off

💵Payment Milestones:
• 50% at kick-off: ~₹1,45,000
• 50% at delivery: ~₹1,45,000

→ Investment Summary

Phase	Status	Cost
Phase 1	✅ Ready to pick	₹2,95,000
Phase 2	⚠️ Needs new APIs	₹6,90,000
Phase 3	⚠️ Needs new APIs	~ ₹2,90,000
TOTAL		**₹12,75,000**

***IMMEDIATE CONTRACT:* ₹2,95,000 (Phase 1 - can start now)**

→ Recommended Approach

WEEK 1: Kick-off Phase 1
• Contract signed
• 50% payment (₹1,47,500)
• Development begins

WEEK 4: Phase 1 Beta Launch
• Deploy to 10-20 beta users

• Gather feedback
• Identify priorities

WEEK 6: Phase 1 Production Launch
• Deploy the application on PlayStore and AppStore *(platform approval timelines are excluded)*
• Monitor production environment for stability

WEEK 8: Phase 2 & 3
• Start when ITD APIs ready
• Iterative enhancement based on feedback

This approach:
✅ Launches working app in 5-6 weeks
✅ Provides real user feedback
✅ Minimal upfront investment

→ Monthly Operating Costs (Post-Launch)

Services: ***₹15,000 - ₹40,000/month***
• AI API costs (usage based)
• Push notifications
• WhatsApp/Email (usage-based)
• Payment gateway commissions

App Store Fees:
• Apple: $99/year (₹8,250)
• Google: $25 one-time (₹2,100)

OnShore Lab's Optional Maintenance (one month free support): ***₹25,000/month***
• Bug fixes
• Minor enhancements
• Monitoring
• Performance optimization

→ Dependencies & Assumptions

⛓️Critical Dependencies:
• ITD provides working API credentials at kick-off
• ITD APIs remain stable during development
• ITD responds to technical queries on time
• Bombino provides beta testing users (10-20)

🧑‍💻Development Assumptions:
• Phase 1 uses only the 3 available ITD APIs
• API limitations documented will be worked around
• Manual user registration acceptable for Phase 1
• Beta launch with known limitations acceptable

⏳Timeline Assumptions:
• API testing reveals no major blockers
• ITD provides reasonable technical support
• No major ITD API changes during development
• App store approvals within 7-14 days

→ Terms & Conditions

💵Payment Terms:
• As specified per phase
• Refunds: Only for undelivered milestones

🛠️Scope Changes Post-Launch:
• Change requests handled separately
• Hourly rate: ₹3,000/hour
• Written approval required

🌐Intellectual Property:
• Source code transferred to Bombino on final payment
• All design assets owned by Bombino
• OnShore retains portfolio rights (with permission)

⛑️Support:
• 30 days free bug fixes post-delivery
• Extended maintenance optional (₹25K/month)
